Outputs of both Scripts Azure Runbook & Local

When two NICS unattached:-

```
NICName   ResourceGroup    SubscriptionName         Location PrivateIP  AttachedTo
-------   -------------    ----------------         -------- ---------  ----------
nic01     NIC              Infrastruction_solution westus    172.16.0.4 None
PE01-nic  private-endpoint Infrastruction_solution westus    172.16.0.5 None
```

When one NIC unattached:-

```
NICName ResourceGroup SubscriptionName         Location PrivateIP   AttachedTo
------- ------------- ----------------         -------- ---------   ----------
nic01   NIC           Infrastruction_solution westus    172.16.0.4 None
```

After deleting the Virtual machine without deleting the NIC:-

```
NICName ResourceGroup    SubscriptionName         Location PrivateIP  AttachedTo
------- -------------    ----------------         -------- ---------  ----------
nic01   NIC              Infrastruction_solution westus    172.16.0.4 None
vm01242 virtual_machines Infrastruction_solution westus    10.0.0.4   None
```
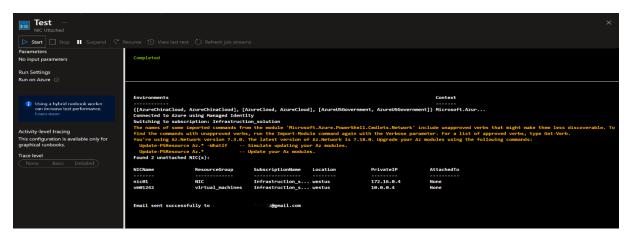

VS Code output:-

```
Switching to subscription: Infrastruction_solution
No unattached NICs found across accessible subscriptions.
Subscription name         Tenant
-----------------         ------
Infrastruction_solution Tech&infra
```

Runbook output:-

Received by mail of unattached NIC-list by Azure automation account:-

to me ▾

Hi Team,

This is an autogenerated report that shows the list of unattached NICs in all accessible subscriptions.

Unattached NICs

NICName	ResourceGroup	SubscriptionName	Location	PrivateIP	AttachedTo
nic01	NIC	Infrastruction_solution	westus	172.16.0.4	None
vm01242	virtual_machines	Infrastruction_solution	westus	10.0.0.4	None

Thanks and Regards,
Your Automation System
